

West Virginia University School of Medicine

Guidelines for Faculty

Appointment, Promotion and Tenure

Approved by Dean's Council, School of Medicine, May 27, 2008

Approved by School of Medicine Faculty, July 31, 2008

Approved by Dean, School of Medicine, August 1, 2008

Approved by Vice President, Health Science Center, September 9, 2008

Accepted by the Office of the Provost, August 14, 2008

Revisions approved by School of Medicine School-wide P&T committee August 7, 2014

Revisions approved by School of Medicine Executive Committee, August 13, 2014

Revisions approved by Chancellor, Health Sciences Center, August 28, 2014

Revisions approved by Office of the Provost September 15, 2014

Revisions approved by School of Medicine Faculty and Executive Committee, Vice President and Executive Dean for Health Sciences, and Office of the Provost, June 30, 2017

Approved by the Office of the Provost, August 30, 2019

Emeritus Faculty (non-tenure)	

General Statement

These guidelines supplement West Virginia University guidelines for promotion and tenure, and specify more precisely some requirements and definitions relevant for SoM faculty. It also explains the conditions of the various tracks. All policies are in accordance with general university policies, except where differences have been approved by the President of West Virginia University or his designee.

This document takes effect for all School of Medicine faculty upon approval by the Provost. When major changes need to be made to the document, the document will be posted on the School of Medicine website for comment by all faculty. Utilizing the faculty input, the dean and/or dean designees will adjust as needed and forward the document to the Provost for review.

WVU faculty personnel actions are governed by policies of the West Virginia University Board of Governors. The Board delegates responsibility for specific decisions and implementation to the President of West Virginia University or his/her designee. The best sources for detailed information regarding Appointment, Evaluation, Promotion and Tenure of Faculty are the West Virginia University Board of Governors Faculty Rules 4, the WVU Faculty Handbook (current edition), and particularly the current version of *Policies and Procedures for Annual Faculty Evaluation, Promotion and Tenure* (distributed annually to all WVU faculty members). These documents collectively provide the personnel action information essential for Deans, School-wide Promotion and Tenure Committee, Chairs, Department Promotion and Tenure Committees, and individual faculty members.

Clear written guidelines with stated expectations for faculty performance, and reliable and fair Promotion and Tenure processes promote SoM and individual department success and effective faculty development, evaluation, retention, and promotion. Evaluations generated by Promotion and Tenure Committees can be used for:

- Faculty development (e.g., performance feedback, identification of strengths, and specific needs for improvement and development).
- Faculty assessment (e.g., recognition of outstanding performance, promotion, retention, merit, and incentive decisions).
- SoM maintenance functions (e.g., planning, identification, and assessment of goals; determining future development needs).
- Documentation (e.g., documentation of faculty personnel actions).

The process of faculty evaluation for the SoM follows the process outlined by the University including annual evaluation, evaluation for promotion in rank, and evaluation of Tenure-Track Faculty for Award of Tenure. Responsibility for the evaluation process is shared:

- Each faculty member has primary responsibility for documentation and presentation of her/his work.
- Initial evaluation and review at the department/division level is by a committee of faculty peers, and by the Chairperson.
- Departmental committees and chairs are responsible for reviewing the University's written guidelines for 'unsatisfactory,' 'satisfactory,' 'good' and 'excellent' contributions. They should consider how to apply these equitably when reviewing faculty performance.
- Subsequently, for any action other than continuation, recommendations of these reviewers are considered by faculty on the SoM Promotion and Tenure Committee and by the Dean or Dean's Designee, the Vice President for Health Sciences and the Provost.
- SoM decisions are reviewed by the Faculty Advisory Panel, which advises the Provost.

Faculty effort is allocated to the three missions of the SoM which are service, teaching, and research/scholarship. The resultant outcomes in each mission are evaluated annually. General definitions of teaching, research and service are provided by the University *Policies and Procedures...* document; the present document expands and clarifies those definitions for SoM faculty. Activities of SoM faculty are sufficiently diverse as to require several appointment tracks as well as some expansion, definition and clarification of requirements for promotion and tenure within each of these tracks. These multiple appointment tracks within the School of Medicine should be recognized as parallel tracks without implied or intended hierarchy.

General Policies

The following important policies (most are extracted from the WVU *Policies and Procedures for Annual Faculty Evaluation, Promotion and Tenure*) apply to all promotion and tenure actions in the School of Medicine and are reprinted here for emphasis:

1. Each department, division, and/or program Chairperson has responsibility for determining for each faculty member (in consultation with them) his/her teaching, research, and service assignments at the time of appointment and annually thereafter. Personnel files must reflect these assignments and the resultant achievement of the faculty member in the various areas at the time of each annual review. Each faculty member is responsible for providing information annually to update the personnel file in accordance with University guidelines.
2. For promotion to associate professor in the non-tenure track there must be a minimum of three reviews on file with the promotion review being the fourth review.
3. For promotion to professor in all tracks there must be a minimum of four reviews on file since the start date or the last promotion with the promotion review being the fifth review.
4. Promotions will be based primarily on achievement since the previous promotion (or appointment).
5. A faculty member whose application for promotion is unsuccessful (not including tenure track faculty in the critical year) must wait at least one full year after the decision is rendered before submitting another application.

General Guidelines for all Tracks

General Guidelines:

- Outcomes should reflect effort allocation (i.e., there may be higher expectations for performance in a mission area when more allocated workload percentage is devoted to it).
- Board-certification is generally considered to be by an American Specialty Board.
- Individuals in the non-tenure tracks have full voting rights in their respective departments and in the School of Medicine and are eligible for appointment to any administrative office in the School, including Department Chairperson and Dean. Non-tenure track faculty have all rights and privileges of academic freedom and responsibility.
- Effort allocations and specific criteria are intended to be used as flexibly as general guidelines and should not be viewed as absolute or rigid.
- The terms "*significant contribution*" and "*reasonable contribution*" have precise meanings in the context of outcome evaluation. See WVU *Policy and Procedures...* document for definitions.
- Maintenance of board-certification is necessary for continuation in a clinical-track appointment.
- Faculty holding M.D. or D.O. degrees who do not practice clinical medicine must be appointed to the appropriate track for assigned duties and should be compensated using the benchmarks for that track.
- Compensation strategy is per school guidelines.
- Scholarship must be peer-reviewed and in the public domain. Peer reviewed book chapters may also meet this requirement.

West Virginia University School of Medicine Guidelines for Faculty Appointment, Promotion and Tenure

- For all promotions, the refereed article (paper) must be published by December 31 of the year the person is being considered for promotion for it to count towards promotion.
- A faculty member may switch tracks once, provided they meet the requirements for the new track, and only with written approval of the Chair, the Dean and/or the Vice President for Health Sciences (with input as necessary from the School of Medicine Promotion and Tenure Committee). The faculty member must be in the new track for at least one full year before requesting promotion. Switching to a tenure track position from a non-tenure track position will also need Provost approval.
- The guidelines for promotion to the next rank (and tenure as applicable) for the track in which a faculty member is appointed should be clearly specified in the letter of offer. This letter should be referenced during the faculty evaluation process by the departmental Promotion and Tenure Committee, the Chair, the School of Medicine Promotion and Tenure Committee and the Dean.
- Outreach activities should be reviewed under the appropriate area (such as service, including clinical service).
- The School of Medicine is willing to recognize extraordinary contributions with credit toward tenure. There are two applicable situations: credit up to 3 years of service at rank at another institution or requesting during the 4th year to have the critical year moved to the 5th year.

Tenure-track additional guidelines:

- Faculty members in the tenure track are usually appointed without tenure, although appointment with tenure is possible. The *WVU Policy and Procedures...* document identifies conditions for such exceptions.
- Tenure-track faculty seeking tenure and/or promotion to Associate Professor must hold extramural funding as PI, or demonstrate substantial involvement as co-PI, co-I or multidisciplinary team member. Typically, faculty achieving tenure recover an average of 20-30% of their salary from extramural sources. Tenured faculty seeking promotion to Professor must hold extramural funding as PI or co-PI. Promotion to Professor requires evidence of a largely independent record of scholarship and a national or international reputation.
- All research faculty in the Scientist tenure-track must document substantial, significant, teaching effort and significant contributions in research in order to be tenured and promoted. Those in the Clinician Scientist tenure-track must document substantial, significant service effort and significant contributions in research in order to be tenured and promoted.
- All tenure-track faculty members must have evaluations of research by reviewers from outside West Virginia University for promotion to Associate Professor and the award of tenure and for promotion to Professor.
- A non-tenured faculty member in a tenure track may switch tracks with written approval of the Chair, the Dean and the Vice President for Health Sciences (with input as necessary from the School of Medicine Promotion and Tenure Committee) at the beginning of any contract year except the critical year.
- A faculty member in a tenure track who is not awarded tenure by the identified critical year will receive a one-year terminal contract and is not eligible for transfer to a non-tenure track.
- Tenured faculty may switch to a non-tenure track by surrendering tenure with written approval of the Chair, the Dean and the Vice President for Health Sciences.
- However, tenured Associate Professors may seek promotion to Professor by switching their areas of significant contribution to teaching and service, and by achieving all criteria for promotion to Professor with significant contributions in teaching and service and reasonable contributions in research in the comparable non-tenure earning track (i.e., Clinical Educator, Scientist Educator, or Clinical/Health Sciences Educator). This would not require a change in track or surrender of tenure. Changes in the areas of emphasis require approval from the Department Chair, the Dean and the Provost. Per the WVU Guidelines: The key principles that should be addressed in pursuing such a change include the following:
 - The process should be forward-looking, not a reflection of service previously performed
 - The process should focus on the service of engagement (that is, service to the citizenry, as opposed to service to the institution or service to the profession)

- The process must serve the interest of the unit and institution as well as the interests of the faculty member
 - There should be some basis for identifying deliverables in advance (that is, there should be a plan) and a method for documenting and evaluating impacts, including meaningful external review
 - There must be written into the agreement a basis for determining what is meant by a “reasonable contribution” in research. This is documented in the School of Medicine Guidelines for Promotion and Tenure in various tracks
 - After the Provost’s approval of the agreement and before consideration of promotion takes place, at least two full annual evaluation cycles normally must be completed
 - The process is not one which should be used to reward lack of performance in research
 - External reviews will be required in the appropriate area of significant contribution documented in the authorization letter.
- The tenure process may be extended for family and/or medical leave or other extraordinary circumstances as per WVU institutional tenure guidelines and BoG Rules so that the critical year may be later than the sixth year. This must be approved by the Chair, the Dean and the Provost in one year increments.

Specialty Track Additional guidelines:

- Specialty track faculty members are only expected to make significant contributions in one mission of the School of Medicine with reasonable contributions in the other two missions.
- Promotion guidelines are similar to those for the tenure tracks but with heavy emphasis on quality and productivity in the mission of interest.
- Faculty members in the research or service track must have evaluations of research or service, as appropriate, by reviewers from outside West Virginia University for promotion to the next rank. Faculty members in the teaching track must have evaluations of teaching by reviewers from outside West Virginia University for promotion to Professor.

General Definitions of Mission Areas

Teaching:

All faculty (except those in the research or service specialty tracks) should have substantial involvement in educational programs such as designing, teaching in, and evaluating educational programs and participating in department educational activities including committees.

Teaching involves the dissemination of knowledge and the stimulation of critical thinking. Teaching includes not only traditional modes of instruction such as the classroom lecture, but also mentoring and precepting students, fellows, and faculty, on-line and distance education, clinical, laboratory, and practicum instruction; thesis and dissertation direction; facilitation of group learning; evaluation and critique of student self-directed learning; participation in various forums for continuing education, patient education, and non-traditional instruction; presentations in seminars, Grand Rounds and conferences; and advising. Outreach teaching activities such as on-line education or teaching outside of the SoM facility as part of job duties should be evaluated as part of the educational outcomes.

Research/Scholarly Activity:

Research involves the creation and synthesis of knowledge, the creation of new approaches to understanding and explaining phenomena, the development of new insights, the critical appraisal of the past, and the application of knowledge and expertise to address needs in society and in the profession. Scholarly accomplishments may be discipline-focused and individual, or interdisciplinary and collaborative. Significant contributions, innovation and demonstrated impact are expected.

Scholarship may include scholarship in traditional research activities, education, and service, and must be peer-reviewed and in the public domain. Some examples of scholarship include but are not limited to peer-reviewed articles in journals or conference proceedings, books and book chapters, patents, research-based

educational media materials (for example, simulations, tutorials, etc.), developing new academic programs, receiving external grants or contracts for research as a result of written proposals, receiving research awards, and research-based development of software and other products that have a broad impact.

As defined in the AAMC monograph, *Advancing Educators and Education: Defining the Components and Evidence of Educational Scholarship*, educational scholarship includes contributions to the educational community to advance knowledge in the field and should be available in a form that others may build upon or use and peer-evaluation, such as AAMC's MedEdPortal®, the Health Education Assets Library, Family Medicine Digital Resource Library, and other peer repositories. Some examples of teaching products include but are not limited to: interactive learning exercises, slide sets with speaker notes, case studies, and new models and strategies for teaching. In order to be considered as peer-reviewed, these should be included in peer-reviewed venues or repositories, be evaluated from conference proceedings, teaching awards, be referenced in peer-reviewed materials, and show adoption by other faculty including descriptions of how the product has been built upon.

Team Science. The School of Medicine recognizes the critical importance of multi-dimensional research programs that cross traditional disciplinary boundaries. Teams of scientists, often from multiple WVU schools/colleges, are uniquely positioned to tackle complex biomedical problems with the potential to have a significant impact on the health and wellness of West Virginians. Historically, faculty evaluation policies have focused primarily on individual scientific accomplishments of research-intensive faculty, therefore emphasizing the expectation for independent scholarly productivity. As a result, many faculty members have been implicitly discouraged from participating in team-based interdisciplinary initiatives.

To remedy this situation annual faculty review processes in the School of Medicine will appropriately recognize an investigator's documented substantive contributions to successful and impactful team-based, trans- and multidisciplinary research initiatives. When appropriate, Department Chairs will include effort allocation to such initiatives in faculty workload assignments. Furthermore, investigators must detail in their annual activity reports their role and specific intellectual and/or technical contributions to each interdisciplinary research project (and publication) in which they participate. Faculty members may request that team-science accomplishments are considered in subsequent promotion and/or tenure decisions, provided they thoroughly document in their promotion review dossier the nature and quality of their efforts, including assessments from interdisciplinary team leaders and other team members. In many circumstances, external reviewers, whose expertise may be outside the faculty member's primary discipline, should be solicited to evaluate the significance and impact of the collaborative contributions. This recognition of team science contributions only applies to the promotion from Assistant to Associate professor. A faculty member hired as an Associate professor without tenure may request consideration of team science accomplishments in their review for tenure. However, a faculty member seeking promotion to Professor, must provide evidence of a largely independent record of scholarship and a national or international reputation.

Mentoring. The School of Medicine also recognizes the critically important role of mentors in the professional development of junior and mid-career investigators. Effective mentoring of one or more faculty colleagues represents a significant contribution, therefore, service as a peer mentor is a highly valued element of service in the context of promotion and tenure decisions. Department chairs will include effort allocation for peer mentoring in faculty workload assignments. Mentoring activities must be adequately detailed in the faculty member's annual activity report and promotion and tenure dossier.

Innovation and Impact. The near- and expected long-term impact of one's scholarly contributions is a critical metric that is often overlooked in annual reviews and promotion decisions, and can be challenging to quantify when compared to the more traditional elements of evaluation such as publications and grants. Consistent with our commitment to supporting the highest-quality, innovative and impactful investigations, the School of Medicine will incorporate an annual assessment of innovation and scholarly impact into annual faculty performance review. This assessment will include reflective statements from faculty members, as well as evaluative input from departmental chairs and, when applicable, departmental review committees.

While innovation can be difficult to measure and evaluate, especially in the short term, it is the investigator's responsibility to clarify the innovation strategy, partnerships, and processes or systems (if applicable) by which his/her innovation performance can be assessed. Similarly, the impact of an individual investigator's or a team's scientific achievements can only be measured with a long-term perspective. The generation of knowledge can ultimately lead to ideas from which novel products or processes emerge, or serve to influence public health or science policy. As with innovation, there is no one-size-fits-all metric for evaluating impact. Investigators are expected to represent the outcomes of their research endeavors in a manner that conveys their impact on the institution, the field of study, and society at large.

Service:

1. **Clinical service** includes all professional activities directly and indirectly related to patient or client care. Significant contributions in clinical service should include evaluation of productivity such as WRVU (work relative value unit) targets for most specialties or other appropriate measures, and quality as defined by specific quality parameters for a given specialty. Outreach clinical service provided outside of the SoM should be reviewed as part of the clinical service evaluation.
2. **Administrative service**
 - a. **Institutional service** includes intramural committee and administrative work critical to the functioning of the SoM, Health Sciences Center, affiliated hospitals, and the University. Examples are serving on Admissions or Infectious Disease Committees and many Chair or Center Director responsibilities.
 - b. **Professionally oriented community and/or extramural service** includes activities in which a faculty member serves as a representative of the University in a professional capacity, such as serving as members or officers in state or national health organizations or professional societies or other service-related organizations or committees; grant and manuscript reviewers; members of test committees for professional certification; and participation in state, regional, national, and international science/medical or medically-related conferences. Outreach activities, including educational activities, within the state on behalf of the medical school should be evaluated as part of administrative service. Civic club activities, hobbies, sports, or non-professional interests are not considered criteria for promotion.

Evidence of a National/International Reputation

Evidence of a national/international reputation includes, but is not limited to: invitations to edit or review for national/international journals; invited service on national/international research advisory or review panels; election to office in national/international professional academic organizations; serving as a consultant to national/international agencies; and invitations to give state-of-the-art lectures at national/international meetings, to organize symposia, to serve as visiting professor at other institutions, and/or to serve as moderator or session chair at national/international scientific meetings.

Joint Appointments Involving School of Medicine Faculty

Joint appointments, usually at the same rank, are restricted to individuals who make major contributions to two or more departments. Faculty with joint appointments must be evaluated annually by both (all) departments, where they are appointed. Chairs may use input from Center Directors in their evaluations. At an annual meeting of the joint appointee and the two (or more) chairs involved, expectations (time devoted to research, clinical service, and teaching in each department) of the faculty member should be defined and documented. Participants should also review annually the appropriateness of continuing the joint appointment. The outcome of this annual conference must be a part of the faculty member's permanent personnel record.

Initiation of required tenure and promotion recommendations will be the responsibility of the department where the faculty member holds primary appointment (and where the majority of assigned duties are performed). The secondary department(s) must be involved by including their evaluation(s) as a part of the faculty person's regular personnel file. Ideally, recommendations for promotion/tenure actions will be the same from all departments. A request for a discretionary promotion is the responsibility of the faculty member.

Policies and Procedures for Changing Faculty Appointment Track

Chairs and deans should carefully consider the most appropriate track for appointing new faculty members. Individuals who decide that their initial choice of appointment track was inappropriate will be permitted the opportunity to request a change of tracks once within a 10-year period. To do so, they must meet the following requirements:

1. Meet all criteria for appointment (at rank) to the other track.
2. The action must be approved in writing by the appropriate Departmental Chair (for joint appointees, relevant Chairs must agree), the Dean and/or the Vice President for Health Sciences. Input from the School of Medicine Promotions and Tenure Committee may be requested as needed. Switching to a tenure track position from a non-tenure track position will also need Provost approval.
3. The request must be initiated, considered and approved before the annual review deadline for documentation (of a particular cycle) if a faculty member is to be considered for a promotion or tenure decision.
4. A tenure track faculty member who is not awarded tenure by the identified "critical" year is not eligible for transfer to the non-tenure track.
5. Should a faculty member switch to the tenure track, the probationary period for the awarding of tenure will begin at the time the tenure track position is assumed, normally the beginning of the next contract year. Years spent in a non-tenure track will not be included as part of the probationary period in the tenure track unless specifically requested and approved. Up to three years' credit for prior experience, including time spent in a non-tenure track, may be requested during the first year of appointment to a tenure track position as approved by the Department Chair, the Dean, and/or the Vice President for Health Sciences, as described in the West Virginia University Policies and Procedures for Annual Faculty Evaluation, Promotion and Tenure, Section IV, "With Credit".

Overview of Tracks, Criteria and Guidelines for Promotion (and tenure when applicable)

Clinical Tracks

--	---	---

** Given the higher teaching/education time commitment and expectation in this track, typically, significant peer-reviewed funding is defined as >20% salary support/year.

Specialty Tracks (non-tenure)

The specialty tracks accommodate the few faculty who contribute substantially to the mission of the SoM, but whose assigned duties do not fit within the other tracks. These faculty members may hold positions constrained, determined or limited by (a) specific source(s) of funding for the position, (b) very specific, often time-limited, needs of a particular unit or, (c) effort distribution that does not align with other tracks.

Examples may include:

- faculty whose position is funded primarily by non-state resources to conduct research
- directors of shared resource facilities providing service to the school and university research mission
- faculty who are or have been willing to serve with substantial effort in administrative service

Specialty track appointments are not tenure- earning and are only for the periods and purposes specified, with no other interest or right obtained by the person appointed by virtue of such appointment. Scholarship related to service, teaching, or research must be demonstrated by faculty members in the Specialty Track in order for promotion in rank to occur.

Research-Track: Faculty funded $\geq 95\%$ by non-state funds as part of a specific research project or program are required to demonstrate significance in the area of research with reasonable contributions in service and teaching in order to be granted promotion. Research must be externally reviewed.

Service-Track: Faculty in the service track must have $\geq 80\%$ effort in service (including administrative service) and must show significant contributions in service with reasonable contributions in teaching/training and research. External reviews of service are required. Service should be evaluated based upon quality, significance, impact, and intellectual work, academic and professional citizenship. Individuals in this track must have documented evidence of consistent engagement and leadership as a citizen of the department, school, and university.

These activities include service to the department, School, University, state, region, and at national and international levels. While the Service-Track is used with discretion, examples of service activities are reflected below. An important detail is that the examples of service below are likely to be part of a faculty member's effort regardless of track because many reflect common activities. However, in the service track these comprise the fundamental activities, as noted, of 80% or greater of the individual's role with a likely leadership position, and evaluation must reflect that well defined focus.

Examples of service activities include, but are not limited to:

- Serving as director, or critical team member of a research core laboratory or other service division within the School or University
- Serving in a significant leadership or administrative position within the department, school, or university
- Consultant activities provided with minimal or no remuneration, related to one's University role
- Development or coordination of continuing education programs or professional development programs
- Programmatic development and/or leadership of mentoring initiatives

West Virginia University School of Medicine Guidelines for Faculty Appointment, Promotion and Tenure

- Presentations to lay public and community groups
- Service on graduate committees and professional student committees. This activity should be considered as either teaching or service, depending on the extent to which the committee member is involved in actual teaching of the student
- Leadership and/or service on critical Internal (WVU) Committee or task forces

- Advising of professional degree students or student organizations

The offer letter and subsequent annual reviews must address the requirements for the position and specific expectations for promotion. Prior to appointment, the offer letter should be reviewed carefully by an appropriate official (such as the Dean or the Dean's Designee). The Provost must also approve hires for the Service Track.

A faculty member can switch to or from a specialty track from a tenure track or non-tenure track position in extraordinary circumstances. Such an exceptional request must be approved by the Chair, the Dean, and the Vice President for Health Sciences, and must represent a distinct change of direction of the career of that faculty member. Such a change should never replace an open, competitive search for new faculty members. Switching to a tenure track position from a non-tenure track position will also need Provost approval.

Lecturer (non-tenure)

This is a part-time and temporary position with a primary mission to contribute to teaching programs of the School of Medicine. Assignments and expectations for continuation and promotion should be detailed in the letter of appointment and in subsequent annual reviews. Appointments for part-time non-benefits eligible faculty can be renewed indefinitely.

Research/Scholarship

Presenting scholarship at local, regional, and national meetings

- As a general rule ≥ 5 publications since appointment. This may include peer-reviewed articles, books or book chapters
- Collaboration on scholarly projects within the field of service which may include external grants or contracts that support research

Special Appointments

BOG Faculty Rule 4.6 defines adjunct appointments:

<https://policies.wvu.edu/finalized-bog-rules/bog-faculty-rule-4-6-adjunct-faculty>

the adjunct appointments described in this section are courtesy appointments.

Adjunct and Adjunct Clinical Faculty (Non-tenure)

Voluntary faculty participate in the SoM academic activities without compensation as “adjunct” or “adjunct clinical” faculty. Basic science faculty should be given “adjunct” appointments. A non-salaried, volunteer faculty member who holds the PhD, MD, DO or other appropriate professional degree and does not practice clinically should be given the title of “adjunct” (and not “adjunct clinical” for MD or DO). MD and DO faculty and other clinical faculty with appropriate professional degrees who practice clinically should be appointed as “adjunct clinical” and must hold a valid unrestricted WV medical or other license and board certification or the appropriate credentials as defined for paid faculty. Volunteer faculty activities include teaching students or residents, collaborating with SoM personnel in research, teaching and service, and other contributions.

Criteria for Courtesy Adjunct Clinical and Adjunct Faculty Appointment and Promotion

All courtesy faculty will be appointed as Assistant Professors unless not board certified (or equivalent) or if they have previously held a full-time or courtesy faculty appointment at a higher rank in which case they will be appointed at the higher rank.

Requirements for appointment to the rank of Adjunct Clinical Instructor or Adjunct Instructor:

- Completion of professional degree at doctoral level (MD, DO) or a baccalaureate degree for professional programs faculty
- Unrestricted current medical license in WV or other state or equivalent if applicable for professional programs faculty
- Completion of an accredited residency and specialty fellowship (if applicable)
- Eligibility for Board Certification in specialty or sub-specialty or equivalent if applicable for professional programs faculty
- Completion of application packet and approval of the Chairman

Requirements for appointment to the rank of Adjunct Clinical Assistant Professor or Adjunct Assistant Professor and above:

- There must be evidence of continued contribution and participation in one of the three areas of the School of Medicine’s missions
- Ongoing Board certification in specialty and subspecialty or equivalent (when applicable) must be maintained
- Unrestricted current medical license in WV or other state or equivalent if applicable is required
- For those clinicians based at CAMC or WVUH-EAST current hospital privileges at CAMC or WVUH-EAST if applicable (for hospital-based clinicians)
- Continued provision of skilled, high quality medical care as judged by peers
- For Professional Programs, appropriate postdoctoral experience or equivalent experience is required an board-certification or equivalence is required if this is available

Criteria for the continuation of Adjunct Clinical Assistant Professor or Adjunct Assistant Professor:

- Participation in one or more of the following in any given renewal cycle (unless otherwise specified):
 - Hosting/supervision of residents and/or student rotations in offsite rotations (at least once in any 2 year period)

West Virginia University School of Medicine Guidelines for Faculty Appointment, Promotion and Tenure

- Consistent teaching evaluations from learners of good or better (when applicable)
- Completion of resident and student evaluations (when applicable) in a timely fashion
- Presentation of lectures to residents and students
- Attendance at WVU School of Medicine conferences such as Grand Rounds, M & M conferences, departmental meetings (can be a CAMC or WVUH-EAST), or CME events
- Supervision of residents in outpatient clinics with consistent teaching evaluations from learners of good or better
- Supervision of residents and students in scholarly activities (research projects, case reports)
- Participation in AHEP (RHEP and/or AHEC teaching activities as a community preceptor or interdisciplinary team participant (at least once in any 2 year period)
- Participation in the visiting clinicians program
- Participation in curriculum development (classroom, rural, interdisciplinary, etc.)
- Participation in WVU sponsored clinical care, related to education or research efforts of the School of Medicine
- Active membership in any WVU School of Medicine committee(s)
- Scholarly activity
 - Medical publication, including abstracts lay press
 - Research collaboration, such as in grants, inclusion in population research or pooled efforts that contribute to the medical fund of knowledge with a full-time WVU faculty member
- Demonstration of leadership in the specialty (at least one of the following)
 - Membership in professional societies: local, state or national (such as and not including AMA, County, specialty societies, etc.)
 - Regional or National award recognition in this field
 - Community Service and Leadership
 - School, Health Department or other community Boards
 - Sustained volunteer activities (Health Fairs, Habitat for Humanity, Health Right, Soup Kitchens, Homeless, etc.)

Criteria for promotion to Adjunct Clinical Associate Professor or Adjunct Associate Professor

- Sustained contributions in two or more of the above areas for at least 5 years at the rank of adjunct clinical assistant professor or adjunct assistant professor

Criteria for promotion to Adjunct Clinical Professor or Adjunct Professor

- Sustained contributions in three or more of the above areas for at least 5 years at the rank of adjunct clinical associate professor or adjunct associate professor
- Undisputed recognition within the local medical community as an outstanding clinician, teacher and/or researcher.

Visiting Faculty (Non-tenure)

1. Visiting faculty are typically on leave of absence or sabbatical from another institution; appointments should be at existing academic rank, or should follow WVU guidelines.
2. Support is typically from non-state funding sources.
3. Appointment is limited to a maximum of twelve months; accordingly visiting faculty are not eligible for promotion in the WVU system.
4. Any visiting clinical physician faculty without a WV license has a term that is limited to 6 months.

Emeritus Faculty (West Virginia University Board of Governors Rule 4.2 Section 10. on Awarding of Emeritus Status; adopted April 20, 2018, Effective May 14, 2018)

Retired or retiring faculty who meet the requirements of meritorious contributions to the University and who normally have served the University for least 10 years as a paid, benefits eligible faculty member shall be considered for Emeritus status. The review of candidates begins in the departments or divisions and ends with the President. The award of President Emeritus rests with the Board of Trustees, and Emeritus awards to major administrators rests with the President. Faculty members and administrators awarded Emeritus status retain their professional titles. In every case, the term "Emeritus" follows the rank and title. Emeritus faculty members and administrators have library privileges; they have the same access as other faculty members and administrators to athletic events, and they enjoy privileges designated by their departments and the University.
